

## CAD Drawing Turnaround Reduced to Minutes

Receiving CAD files for bar layouts is now as quick and easy as selecting a checkbox on your GTdesigner submission and immediately refreshing your inbox.

Within minutes, you'll receive an email from our team with two attachments: the CAD drawing and a copy of the 3D design file to import into GTdesigner for edits and review.

The screenshot shows the GTdesigner web interface. On the left is a sidebar with product categories: Underbar, Refrigeration, BD (Beer drainer / undercounter tower), BEV-ACC (Beverage line accommodation), CB (Combo ice bin), and Corner (Corner drainboard & filler). The main area displays a 'Submit your design' form. The form includes fields for First name (John), Last name (Doe), Company (Glastender), Company zip/postal code (48604), Email (jdoe@glastender.com), and Job name (Dream Bar). There is a checkbox for 'AutoCAD' which is checked. At the bottom of the form are 'Submit' and 'Cancel' buttons.

### GTdesigner: Design review request (Dream Bar)
